STATUS OF THE CLAIMS

1-15 (cancelled)

16. (previously presented) A method of protecting ocular neural tissue from damage caused by photodynamic therapy (PDT) treatment comprising delivering a composition to a patient's ocular neural tissue, the composition comprising an amount of brimonidine effective to protect a plurality of ocular neurons from cell death caused by a photoactive component of the PDT treatment as compared to ocular neuron cell death observed in the absence of the administration of said neuroprotectant.

17. (cancelled)

- 18. (previously presented) The method of claim 16 wherein said brimonidine is administered at a time sufficiently before said PDT treatment to permit localization within ocular tissue prior to said treatment.
- 19. (previously presented) The method of claim 16 wherein said brimonidine is administered intravenously.
- 20. (previously presented) The method of claim 16 wherein said brimonidine is administered through intraocular injection.
- 21. (previously presented) The method of claim 16 wherein said brimonidine is administered by subretinal injection.
- 22. previously presented) The method of claim 16 wherein said brimonidine is administered by intravitreal injection.

23-29 (cancelled)

30. (currently amended) The method of any of the preceding claims $16 \ \text{or} \ 18$ -22 wherein said composition also comprises an therapeutically effective amount of a antiangiogenic compound.

31-38 (cancelled)
